(54) METHOD FOR DISPLAYING PLURAL DISPLAY IMAGES WITHIN DISPLAY WINDOW OF INFORMATION PROCESSOR

(57)Abstract:

PROBLEM TO BE SOLVED: To continuously display plural related information on the display screen of an information processor in order.

SOLUTION: An area where the display image showing the 'month' of the calendar within a display window 101 is displayed is magnified by the drag of a cursor 109. By interlocking with this magnification, an area where display images showing a 'day', a 'day of the week' and an event schedule can be displayed is also magnified and the area attains a prescribed size, the retrieval of data is performed in response to the magnification and related display images, that is, the display images showing the 'day', and the 'day of the week' and the event schedule are automatically displayed. The location where these are displayed is determined by the relation of the information that the display images show with each other. Thus, the information related to the information that the display image shows is automatically retrieved and the corresponding display image is displayed by only the operation of the magnification of already displayed display image. Therefore, plural related information become possible to be continuously taken out on the display screen of an information processor in order.

LEGAL STATUS

[Date of request for examination] 23.07.1999

[Date of sending the examiner's decision of rejection] 31.07.2003
